EXPERIMENT 8 - Query with Sub Query& Correlated Query

1)

```
mysql> SELECT Name, CourseNo, Mark
-> FROM COURSE_MARKS2
-> WHERE Mark > (
->     SELECT AVG(Mark)
->     FROM COURSE_MARKS2
-> );
```

Name	CourseNo	Mark
Arun	C001	85
Karthik	C001	90
Priya	C002	80
Anitha	C003	95
Vijay	C003	85
Kiran	C004	88

6 rows in set (0.01 sec)

2)

```
mysql> SELECT StudentName,
->     COUNT(Test_No) AS Number_of_Tests
-> FROM ASSESSMENT
-> GROUP BY Reg_No, StudentName
-> HAVING COUNT(Test_No) > 1;
```

StudentName	Number_of_Tests
Arun	2
Karthik	3
Priya	2

3 rows in set (0.01 sec)

3)

```
mysql> SELECT FacName, DOJ
-> FROM FACULTY
-> ORDER BY DOJ DESC
-> LIMIT 1;
```

FacName	DOJ
Ravi	2010-06-15

1 row in set (0.00 sec)

4)

```
mysql> SELECT CourseNo, Mark
-> FROM COURSE_ASSESSMENT CA
-> WHERE Mark > (
->     SELECT AVG(Mark)
->     FROM COURSE_ASSESSMENT
->     WHERE CourseNo = CA.CourseNo
-> );
```

CourseNo	Mark
C001	80
C001	90
C002	90
C003	85

4 rows in set (0.01 sec)

RESULT:

The records from the tables are displayed using Sub-Query and Correlated Sub-Query.
