

CSA0503-DATABASE MANAGEMENT SYSTEMS

EXPERIMENT 8 - Query with Joins – EquiJoin, InnerJoin, OuterJoin

1)

```
mysql> SELECT DISTINCT Dept
-> FROM FACULTY;
+-----+
| Dept |
+-----+
| CSE  |
| ECE  |
+-----+
2 rows in set (0.00 sec)
```

2)

```
mysql> SELECT StudentName, CourseNo
-> FROM STUDENT_SCORE
-> WHERE Mark IS NULL;
+-----+-----+
| StudentName | CourseNo |
+-----+-----+
| Divya       | C001     |
| Mohan       | C002     |
| Rahul       | C003     |
+-----+-----+
3 rows in set (0.00 sec)
```

3)

```
mysql> SELECT * FROM FACULTY_COURSE;
+-----+-----+-----+-----+-----+
| FacNo | FacName | Dept | CourseNo | CourseDesc |
+-----+-----+-----+-----+-----+
| F001  | Ratnam  | Sales | C001     | Marketing  |
| F001  | Ratnam  | Sales | C002     | Sales Management |
| F001  | Ratnam  | Sales | C003     | Business Communication |
| F002  | Ravi    | CSE   | C004     | Database   |
| F003  | Kumar   | ECE   | C005     | Electronics |
+-----+-----+-----+-----+-----+
5 rows in set (0.00 sec)

mysql> SELECT CourseDesc
-> FROM FACULTY_COURSE
-> WHERE FacName = 'Ratnam'
-> AND Dept = 'Sales';
+-----+
| CourseDesc |
+-----+
| Marketing  |
| Sales Management |
| Business Communication |
+-----+
3 rows in set (0.00 sec)
```

RESULT:

The records from the tables are displayed using JOIN using EquiJoin, InnerJoin, OuterJoin.
